

Fernide Is Studying To Be A Nurse

Colossians 3:23 says, *"And whatsoever ye do, do it heartily, as to the Lord, and not unto men;"* We believe this describes Fernide Medy very well. She is working hard to do her best for the Lord.

Last year when Fernide was preparing to graduate high school, she wrote her sponsors that she wanted to study nursing. Her sponsors were willing to help, but there were no medical schools in her area. It was then that Pastor Bruceley met with a doctor from Port au Prince. The medical school he represents wanted to open a satellite school in the Ti-Goave area. The satellite students would receive the same accredited training as those in the city. So this year, the satellite school opened and Fernide became a student of their first nursing program.

To begin, Fernide had to pass the initial test to qualify for the program. She passed but her score was not the best in her class. However, since then her enthusiasm for her studies has put her at the top of her class. The doctor who heads the program said that Fernide has become their best student. Even the hospital where she trains has taken notice of her.

For the past decade, many Haitian young people have left Haiti in search of better opportunities in other countries. We want to provide our sponsored children with the means to stay and be a generation that will change Haiti for Christ.

Fernide is saved and a member of the Ti-Goave church. She is a testimony of how your prayers and faithful support are making a difference in Haiti!

The Cazeau School Needs A New Well

The well drillers checked the depth of the well by lowering a weighted tape measure.

When we were preparing to dig the new well at Guedon recently, we asked the well drillers to evaluate the well at the Cazeau school. The principal told us the electric pump stopped working. The well drillers made several trips to check it. They discovered that the well is 50 feet deep and the water is slow to refill. That is what caused the electric pump to overheat and become ruined.

The well drillers recommended that we dig a new 200 foot well and install a solar powered pump. Our local community has a solar powered well that has been working good for several years.

We need \$11,800 to drill the new well and install the solar powered pump and equipment. If you can help, your support will provide fresh water for this growing school. Thank you for giving!

Gifts For Preschool Furniture & Founders' Challenge

Thank you for your gracious response last month for the Cazeau Preschool furniture and for Our Founders' Challenge. We received several combination offerings that we used for both needs. Offerings like these are always a blessing.

We received the offerings needed to have the Preschool furniture made. We also received \$6,000 for Our Founders' Challenge. That helps greatly. It takes \$7,500 each month for the mission campus and work crews to operate. Please consider giving to Our Founders' Challenge monthly. We so appreciate your gracious support.
